mukundkrishna0226@gmail.com

Bengaluru, Karnataka

CAREER OBJECTIVE

Motivated and detail-oriented professional with strengths in web development, Python programming, and data analysis. Skilled in creating responsive, user centric solutions using modern technologies, supported by strong analytical and visualization abilities with tools like Power BI. Hands-on experience building interactive Python projects and currently expanding knowledge in Kubernetes and cloud technologies. Ready to work in any environment while delivering efficient, scalable digital solutions.

PROJECTS

• Career Match

Developed a responsive job-matching interface using HTML and CSS, enabling resume uploads and automated internship/job recommendations, improving opportunity visibility and user navigation efficiency by 40%.

• BSF (Bikers Safety First)

Engineered interactive UI/UX wireframes and prototypes using Figma and user-cantered design principles, incorporating gamified elements to enhance road-safety awareness and increase user engagement by 35%.

• Tours and Travel Management System

Built a structured web-based travel management platform using HTML and CSS, streamlining tour browsing and booking workflows, resulting in user task-completion improvement of 30%
